

SCALE FOR PROJECT PISCINE RUBY ON RAILS / DAY 04

You should evaluate 1 student in this team

Git repository

git@vogsphere.msk.21-school.r

Introduction

For the smooth running of this evaluation, please respect the following rules:

- Remain polite, kind, respectful and constructive whatever happens during this conversation. It's a matter of confidence between you and the 42 community.
- Highlight the potential problems you've had with the work you're presented to the person or the group you're grading, and take the time to talk about and discuss those issues.
- Accept the fact that the exam subject or required functions might lead to different interpretations. Listen to your discussion partner's perspective with an open mind (are they right or wrong ?) and grade them as fairly as possible.
42's teaching methods can make sense only if peer-evaluation is taken seriously.

Guidelines

- You must only evaluate what you will find in the student's or group's GiT repository.
- Take the time to check that the GiT repository matches the student or group and the project.
- Double check that no malicious alias was used to mislead you and make you grade something different from the official repository content.
- If a script supposed to help evaluate the exam is supplied by either side, the other side will have to strictly check it to avoid nasty surprises.
- If the evaluating student has not yet taken this project, they will have to read the exam subject in its entirety before starting the evaluation.
- Use the flags available on this grading system to signal an empty or non-functional project, a norm flaw, cheating, etc. In that case, evaluation stops and final grade is 0 (or -42 if it's a cheating problem). However, if it's not a cheating problem, you are invited to keep talking about the work that has been done (or not done, as a matter of fact) in order to identify the issues that lead to this stalemate and avoid it next time.
- You must stop grading when one exercise is not correct, even if the other ones are.

Attachments

 subject.pdf

Foreword

This section is dedicated to the evaluation start and the checking of prerequisites. It's not graded, but if something's wrong or a condition is not met, here or anytime during the evaluation, the grade is 0 and a flag can be ticked if necessary.

Observing instructions

- The repo contains the evaluated student's or group's work.
- The evaluated student or group can explain their work anytime during the evaluation.
- The student must have properly installed gem rails: no error message will be tolerated when running the 'rails new' and 'rails server' commands.
- The Gem rubycritic is present in the gemfile and it's report's 'code smells' thumbnail is empty.
- If ANY of the instructions above is not respected, evaluation continues but it won't be graded.
- General and specific instructions are observed all through the day.

 Yes

 No

Ruby Rails Training D04

- D04 is entierly dedicated to rails. This is not about Gems anymore.

ex00 CheatSheet

- The project is named "CheatSheet"
- The server runs flawlessly
- Rubycritic doesn't return any "smells" in its report
- The content is the same as what the link in the subject shows. It's just one page, without a nav-bar
- The CSS is similar (don't be too narrow minded. Design is not the main aim in this exercise)
- The CSS is in the Assets folder. There must be no CSS in any html.erb file
- When you inspect the elements with the navigator (right click > "Inspect element"), the page's "title" tag is named "CheatSheet"

The exercise is invalid if one of the requirements is not perfectly executed.

 Yes

 No

ex01 Moar CheatSheet

- The project is named "NewCheatSheet"
- The server runs flawlessly
- Rubycritic doesn't return any "smells" in its report
- The content is the same as what the link in the subject shows.
- Each part/theme is set in a separated thumbnail
- Are present:
 - "convention", "console", "ruby", "ruby-concepts", "ruby-numbers", "ruby-strings", "ruby-arrays", "ruby-hasches", "rails-folder-structure", "rails-commands", "rails-erb", "editor" and "help"
- The CSS is similar (don't be too narrow minded. Design is not the main aim in this exercise)
- The CSS is in the Assets folder. There must be no CSS in any html.erb file
- When you inspect the elements with the navigator (right click > "Inspect element"), each thumbnail has a "title" tag with a matching name

The exercise is invalid if one of the requirements is not perfectly executed.

 Yes

 No

ex01 Quick-search

- Everything in the ex00 still works here.
 - The new thumbnail is called "Quick search". This also must appear in the title
 - The Datatable plugin is included by the Gem (no wild copy/paste!)
 - Javascript scripts are ONLY included in the assets folders
 - No error message pops up when loading the page
 - Of course, the plugin default column-sort, pagination and search functionalities are operational
- The exercise is invalid if one of the requirements is not perfectly executed.

 Yes

 No

ex03 Diary

- Everything in the ex00 and ex01 still works here.
- The new thumbnail is named "Log book" (its "title" as well).
- There is an input and a "Write" button.
- The "Write" button redirects towards the same page.
- When you click on "Write" and text is present in the matching input, the text appears at the top of the list, not in the end.
- There is no db. The db/schema.rb files only includes: ActiveRecord::Schema.define(version: 0) do end and a few commented lines.
- Text inputs are stored in a text file at the root of the project. Any modification in this file must appear in the app after refreshing the page.
- Of course, date and time appear before any input in the following format (DD/MM/YYYY hh:mm:ss:) Oh ! I almost forgot... The exercise is invalid if one of the requirements is not perfectly executed.

 Yes

 No

Ratings

Don't forget to check the flag corresponding to the defense

 Ok

 Outstanding project

 Empty work

 No author file

 Invalid compilation

 Norme

 Cheat

 Crash

 Incomplete group

 Forbidden function
