

SCALE FOR PROJECT PISCINE RUBY ON RAILS / DAY 05

You should evaluate 1 student in this team

Git repository

git@vogosphere.msk.21-school.r

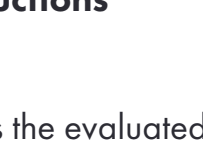

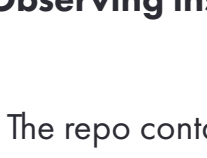

Introduction

For the smooth running of this evaluation, please respect the following rules:

- Remain polite, kind, respectful and constructive whatever happens during this conversation. It's a matter of confidence between you and the 42 community.
 - Highlight the potential problems you 've had with the work you're presented to the person or the group you're grading, and take the time to talk about and discuss those issues.
 - Accept the fact that the exam subject or required functions might lead to different interpretations. Listen to your discussion partner's perspective with an open mind (are they right or wrong ?) and grade them as fairly as possible. 42's teaching methods can make sense only if peer-evaluation is taken seriously.
- ## Guidelines
- You must only evaluate what you will find in the student's or group's GiT repository.
 - Take the time to check that the GiT repository matches the student or group and the project.
 - Double check that no malicious alias was used to mislead you and make you grade something different from the official repository content.
 - If a script supposed to help evaluate the exam is supplied by either side, the other side will have to strictly check it to avoid nasty surprises.
 - If the evaluating student has not yet taken this project, they will have to read the exam subject in its entirety before starting the evaluation.
 - Use the flags available on this grading system to signal an empty or non-functional project, a norm flaw, cheating, etc. In that case, evaluation stops and final grade is 0 (or -42 if it's a cheating problem). However, if it's not a cheating problem, you are invited to keep talking about the work that has been done (or not done, as a matter of fact) in order to identify the issues that lead to this stalemate and avoid it next time.
 - You must stop grading when one exercise is not correct, even if the other ones are.

Attachments

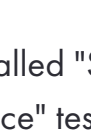

Foreword

This section is dedicated to the evaluation start and the checking of prerequisites. It's not graded, but if something's wrong or a condition is not met, here or anytime during the evaluation, the grade is 0 and a flag can be ticked if necessary.

Observing instructions

- The repo contains the evaluated student's or group's work.
- The evaluated student or group can explain their work anytime during the evaluation.
- The rubocop command running at the root of the project must not detect any 'offense'.
- General and specific instructions are observed all through the evaluation.

Yes

No

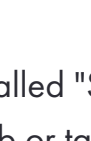

Ruby Rails training D05

- D05 is completely dedicated to Rails SQL and ORM. - For the sake of clarity, you can run one test at a time.

```
\begin{42console} ruby -I"lib:test" test/chemin\_du\_test/nom\_du\_fichier.rb -n "test\_nom"\end{42console} (JE TE LAISSE NOTER LE CHEMINEMENT CORRECT EN ANGLAIS) You will replace "name" by the name of the test you will run. Because of dependancies, command might not run properly. This will not be tolerated during the evaluation. You must manage these errors.\
```

ex00 CRUD starts here

- The app is called "Seek_well"
- You must be able to click "create_db", "create_table" and "drop_table" without an error page showing up even if the file and/or the table already exists.
- The tests that must pass are "db_file_creation", "db_table_creation" and "db_drop" in the file "test/controllers/ft_query_controller_test.rb"
- The only authorized global variable in the three methods is '\$db'

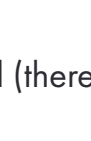

Yes

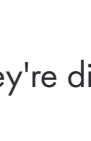

No

ex01 Seed and migrations

- The app is called "tweetos_aka_hello_rails".
- The "db/seeds.rb" file is identical to the one in the subject.
- You can run "bundle install" and "rake db:reset" at the root of the 'tweetos_aka_hello_rails' application without any error.
- You can run the application server without any error.

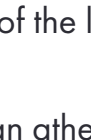

Yes

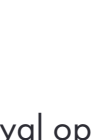

No

ex02 Create and read

- The app is called "Seek_well".
- The "start_race" test passes properly.
- As required by the subject and the tests, clicking 'subscribe/start race' without a name in the dedicated boxes automatically assigns them to 'anonymous'.
- Boxes in front of 'time' or 'update name' also get automatically filled up with the right values.
- Tables are properly created (name, component, db...)
- The 'start_race' test passes properly.

Yes

No

ex03 Active Record Associations

- The app is called "tweetos_aka_hello_rails"
- The following tests run properly
- test/comments_controller_test.rb
- test/cuicuis_controller_test.rb
- test/likes_controller_test.rb
- test/users_controller_test.rb
- If you have doubts, run the "rails console" command at the root of the application and run tests.

Yes

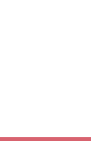

No

ex04 Dynamic creation

- The app is called "Seek_well"
- Even if the db or the table doesn't exist, you can hammer the "time" buttons without getting an error page.
- The 'insert_time_stamp' passes properly.

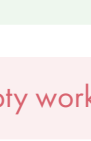

Yes

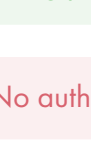

No

ex05 Validation

- The app is "tweetos_aka_hello_rails"
- Views are uncommented and can be visited without any exception or error.
- All the tests in "test/models/" pass, except 'testing the top scope' in 'tweet_test.rb'.
- If you have doubts, run the "rails console" command at the root of the application and run object creation tests.

Yes

No

ex06 3D

- The app is called "Seek_well"
- Even if the db or table doesn't exist, you can hammer the "delete_all" and "delete_last" buttons without getting an error page.
- The following tests run properly
- "delete_last"
- "destroy_all"

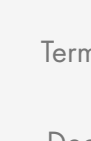

Yes

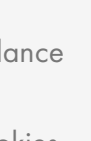

No

ex07 Model Methods

- The app is "tweetos_aka_hello_rails"
- The "http://localhost:3000/users/2" user page is completely uncommented (there are 3 tables) and they're displayed properly.
- The first line of the top left table is
- 12
- To you, I'm an atheist. To God, I'm the loyal opposition.
- 2016-05-25 11:8:20 UTC
- The first line of the top right one is
- 500
- 50
- Unwisely, Santa offered a teddy bear to James, unaware he had been..
- 2016-07-12 18:8:20 UTC
- Clicking on the tweets' numbers, check that it leads to Jeremy's tweets and that they're sorted out well.
- The first line of the lowest table is
- 12
- To you, I'm an atheist. To God, I'm the loyal opposition.
- 2016-05-25 11:8:20 UTC

Yes

No

ex08 Select

- The app is "Seek_well"
- Clicking "Show all by name" or "Show all by race" without db or table or time_stamps doesn't redirect to an error page.
- "Show all by name" and "Show all by race" buttons are properly display respectively the time_stamps by "name" or "race" in the right table.
- The 'all_by' test passe properly.

Yes

No

ex09 Scope

- The app is "tweetos_aka_hello_rails"
- The "http://localhost:3000/likes" page is displayed without any error.
- The "testing the top scope" test in the 'test/models/cuicui_test.rb' passes.

Yes

No

ex10 CRUD Ends Here

- The app is "Seek_well"
- Clicking any "update_name" button anytime will not redirect on an error page.
- The 'update time stamp' test passes properly.

Yes

No
